

# GETMAPPING PLC

## Environmental Policy

The company will use policies and procedures that will ensure the conservation of natural resources while minimising any adverse environmental impact from our operations, including, but not limited to, waste reduction, energy saving and recycling.

We will conduct an annual self-evaluation of our performance in implementing these principles and in complying with all applicable laws and regulations.

We will work with our suppliers to ensure they recognise and reduce the environmental impact of their products and transportation.

The company operates an energy conservation policy to ensure that all non-critical equipment is switched off when not needed.

The company maintains that a primary part of its corporate environmental strategy is sustainable waste management and as such recognises its responsibilities to recycle materials wherever possible.

Getmapping will endeavour to perform business electronically, to reduce paper usage. We will always see to purchase products that are environmentally friendly, re-usable, recyclable and that do not damage the environment.

Whenever possible, Getmapping re-uses incoming packaging materials.

All employees are made aware of this policy and their responsibilities for environmental issues.

This policy statement is on display at the company premises and is made available to the public via our website.
